Cooperatives as a successful business model for
women's empowerment in the energy transition of
Morocco

Bonn UNFCCC SBI50 06-2019

Women and energy in Morocco

- Women are energy managers at home
- Unpaid and underappreciated workload
- Health burden essentially on women
- Lack of conscience of inequalities
- Women have little or no decision making power

Morocco's NDC

REs share evolution within the national mix

Roadmap for solar energy deployment to meet national needs

Energy solutions for rural areas

Solar Cookers

Processing and cooking

Solar Dryers

Processing food products

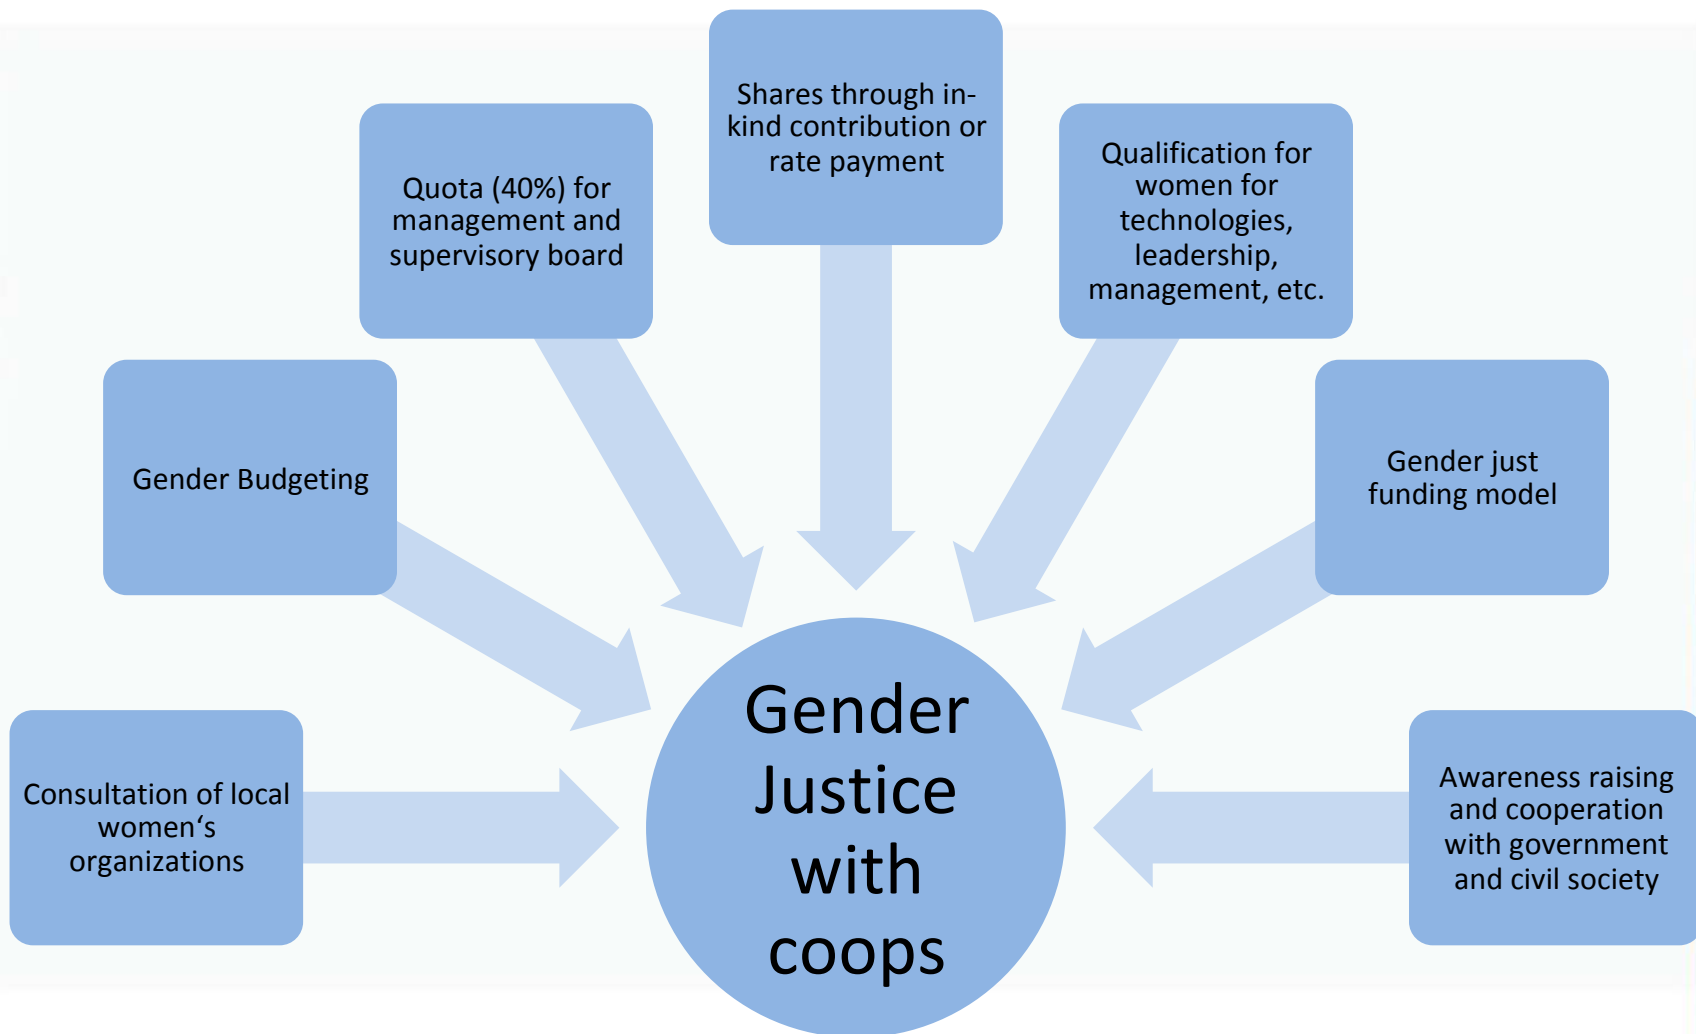

Solar Oven / Electricity Production

Schools buildings, production sites, offices

Clear gender strategies

for equal participation of women and men

Energy access is catalyst for development

Access to energy

Access to finance

Capacity building

Sustainable business
