

# GCF support in the implementation of its gender policy at country level

---

Titi Soentoro  
AKSI - Executive Director

# Climate Finance FLOWS

# Fund sizes

(based on pledges made by countries)

# The context of communities receiving climate finance

---

Any financing  
(including climate financing from GCF)  
does not go to an empty place

Goes to a place with a complexity of  
intertwining patriarchy, capitalism,  
fundamentalism and militarism

Ignoring this complexity

Add burden to already affected women  
and their communities

# Realities of women

---

This complexity is reflected in women's realities

-  Women's rights to participate in decision making, to information, health, education, adequate living environment
-  Raising religious fundamentalism pushed women backward and re-domesticated (not allow to be leaders, no public speaking, serve husband and family only)
-  Criminalization of women who defend their land and livelihoods
-  Climate finance mind-set that overemphasis low carbon economic path and undermine economic and social sustainability

# Envisioned future GCF

---

Future gender transformative GCF we envisioned as follows:

Consider the complexity of lives face by communities and their women in the project proposal process and trigger:

- ✓ Respect to human and women's rights
- ✓ Create women's leaders
- ✓ Avoid land and resource grabbing
- ✓ Balanced consideration between low carbon and environmental and social sustainability

# How?

---

Thank you!
